## Trimble Constructible Process

**Whatever You Can Imagine, You Can Build**

*From boots on the ground to buildings in the sky, Trimble Constructible lets you build beyond the limits of BIM. Using constructive data and real-time collaboration, every person, phase and process works together seamlessly, optimizing the entire design, build and operation lifecycle.*

### CONNECTED

---

By liberating data and breaking down silos, coordination and construction project management is improved across every touchpoint.

### CONTENT-ENABLED

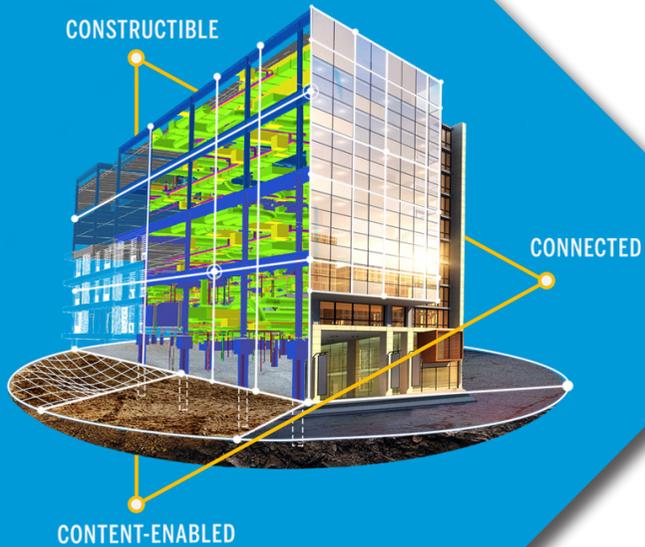

---

Managed Content ensures you're working with the most up to date manufacturers' content.

### CONSTRUCTIBLE MODELS & WORKFLOWS

---

Precise geometries help uncover issues earlier. With constructible workflows, building data is used in the field to direct the construction process.

More industry players are recognizing the value of 3D-models and digital construction data as the key to improving overall project efficiency with a holistic approach to construction projects. At Trimble we have developed a unique lifecycle approach to ensure our customers can successfully realize the full benefits of BIM and automate construction.

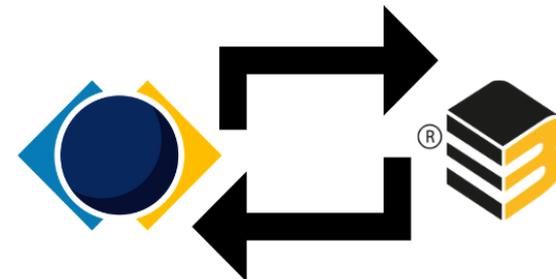

For contractors, ProjectSight is your starting point to get involved in the [Trimble Constructible Process](#).

ProjectSight enables your team to interact with BIM directly within the application, by leveraging the power of [Trimble Connect](#).

Approved project stakeholders access to the models without the need for pricy design software.

## Integrated Workflow with e-Builder Enterprise

ProjectSight and [e-Builder Enterprise](#) integrations instantly connect you to the project owner so that you can integrate workflows, remove inefficiencies and save time by eliminating the need for double data entry.

# INTRODUCING

## THE FUTURE OF PROJECT MANAGEMENT

### PROJECTSIGHT

TRIMBLE'S NEXT-GENERATION PROJECT MANAGEMENT SOLUTION.

*Trimble ProjectSight is construction project management software for budget & cost management, document control and field management designed for contractors. Integrated workflows between contractor and owner eliminate unwanted surprises, speed decisions and deliver next-generation productivity.*

1

Budget and Cost Management

2

Document Control

3

Field Management

Improve and enhance collaboration by completing your profile and setting your personal preferences.

Set your own log-in preferences and automatically reset forgotten passwords

ProjectSight provides an unparalleled level of accountability by leveraging Trimble Identity.

- One simple login to all of Trimble's next-generation software.
- Providing increased data integrity by validating who they are and logging what they do.

# TRIMBLE IDENTITY

# UPDATED USER INTERFACE

ProjectSight is a 100% cloud-based construction project management software for contractors.

- *Intuitive and modern user interface available in your internet browser.*
- *Configurable to adapt to your personal preferences.*

The screenshot displays the ProjectSight web application interface. At the top left is the Trimble logo, and the user's name, Timothy Davis, is shown at the top right. The main content area is titled "Viewing 7 Projects" and features a grid of seven project cards, each with a thumbnail image and a title: Administration Building, Campus Housing, Fine Arts Center, New Stadium, Power Plant, Research Lab, and Warehouse. To the right of the grid is a search and filter panel. This panel includes a search bar, a "Status" section with three toggle switches for Preconstruction (blue), Construction (yellow), and Close-out (green), and date pickers for "Start Date" and "End Date". Below these are several dropdown menus for filtering by "Company", "Type of Building", "Type of Construction", "Type of Contract", "Province/State", "Territory", "Region", and "Country". A "Reset Search" button is located at the bottom of the filter panel.

Built on Trimble's Global Infrastructure, networks are secure and highly available to ensure that you have the best performance possible anywhere and anytime.

Manage all of your projects in one centralized location, breaking down information silos.

ProjectSight encourages real collaboration between stakeholders, enabling you to make and share informed decisions fast and from anywhere. Team conversations bring a level of transparency to the process by allowing relevant parties to have insight into why decisions were made.

Automated notifications keep the team informed and provide visibility into the workflow status.

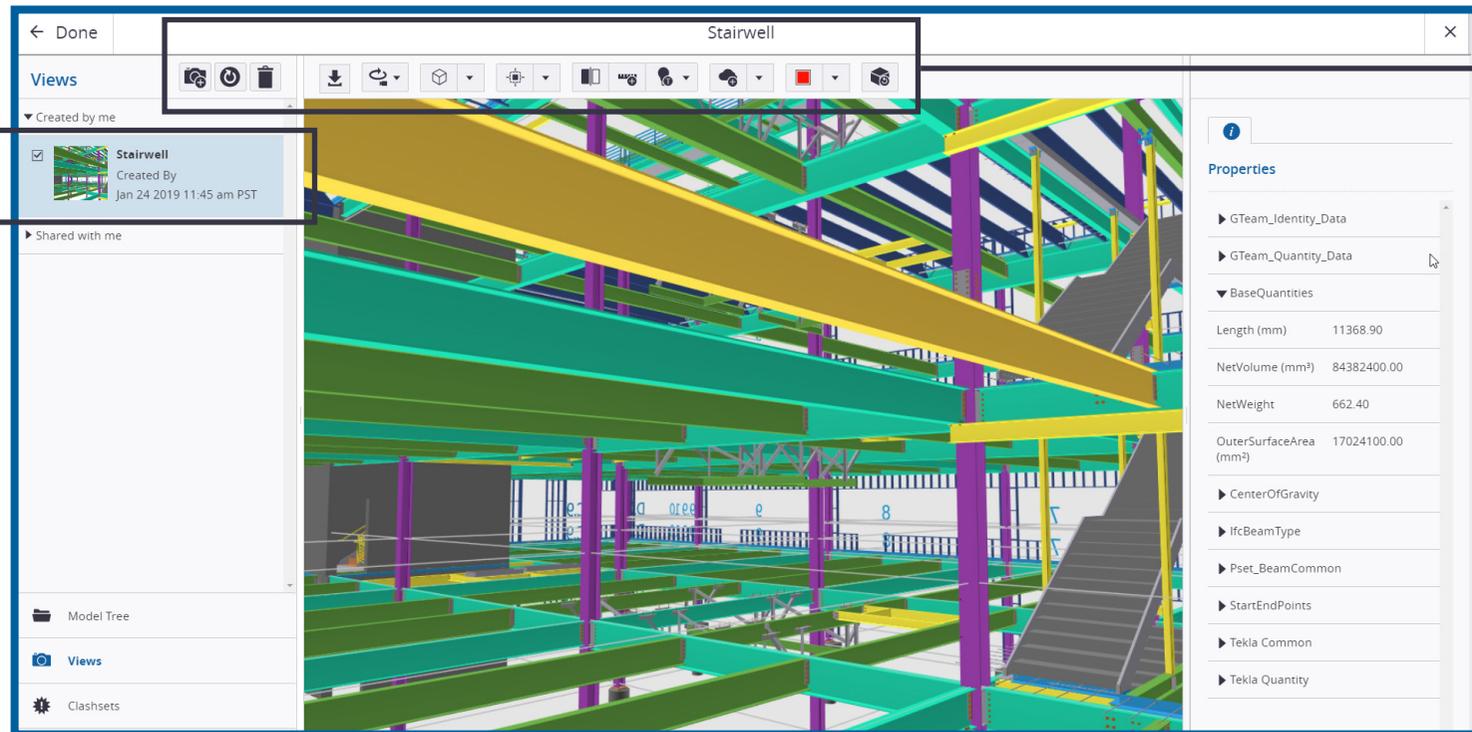

ProjectSight moves beyond paper forms by allowing your team to collaborate in real time and enrich the information, eliminating back-and-fourth workflow issues.

- *Reduce cycle time by providing better access to information from the start.*

# INFORMATION ENRICHMENT

# CONSTRUCTIBLE MODELS

Bringing together architectural, structural, mechanical, electrical and plumbing on one screen in a complete constructible model allows you to identify and solve potential issues before they're full-scale problems.

Give simple 3D context to any project team member with views and link them back to any ProjectSight record.

Powered by Trimble Connect, start exploring and interrogating any BIM model uploaded by the project team. Trimble Connect will work with all major BIM authoring tools.

ProjectSight will allow you to remove modules not required for a specific security role.

Role-based security settings make administration a simple and flexible.

Control down to the individual field level

The screenshot displays the ProjectSight interface for the 'University Student Union & Wellness Center' project, specifically the 'Budget and Cost Management' section. A 'Potential Change Orders' module is highlighted under 'Change Management'. A modal window titled 'Viewing 9 Security Roles' is open, showing a list of roles with checkboxes and descriptions. The 'Collaborator - Subcontractor' role is selected. A sidebar on the right shows the 'Fields' configuration for 'Potential Change Order', with various fields like 'Approved Days', 'Approved For Budget', 'Author', etc., each with a status indicator (checkmark or minus sign).

ProjectSight provides enterprise-level security and configuration tools to ensure the integrity of your information and allow the user experience to be fine-tuned.

- *Years of experience with industry-standard Prolog have dramatically improved the security in ProjectSight.*

## CONFIGURABLE SECURITY ROLES

# CONNECTED TO e-BUILDER ENTERPRISE

Contractor & Owner Project Management software share vital data.

Finally, integration between contractor & owner project management systems allows both organizations to own their own data and reduce double effort. ProjectSight and e-Builder Enterprise effortlessly share data connecting workflows across teams.

Notice the e-Builder tab in ProjectSight

Formal RFI response is received by ProjectSight and marked ready for review. Notifications are sent to assigned users.

RFI Question formally submitted to e-Builder enterprise

RFI automatically received by e-Builder enterprise with the correct number and all information (including attachments) and routed through the Owner's workflow process.

OWNER'S WORKFLOW PROCESS

-  **BUDGET** ————○ Central hub for all financial transactions.
-  **CONTRACTS** ————○ Create and manage contracts with owners, suppliers , and subcontractors.
-  **PURCHASE ORDERS** ————○ Track materials, equipment, and supplies that are purchased from vendors.
-  **POTENTIAL CHANGE ORDERS** ————○ Manage all potential risks that may impact scope, schedule, and budget.
-  **CHANGE ORDERS REQUESTS** ————○ Formally request approval for additional funds for out of scope work and additional time for Justified delays.
-  **SUBCONTRACT CHANGE ORDERS** ————○ Approve official amendments to your subcontracts. Update contract dates and schedule of values to reflect the changes.
-  **PRIME CONTRACT CHANGE ORDERS** ————○ Allow for formal modification to your contract with the owner. Update contract dates, and schedule of values to reflect the changes.
-  **CONTRACT INVOICES** ————○ Manage all subcontract invoices. Provide visibility into their payment process and make sure they get paid in a timely manner.
-  **GENERAL INVOICES** ————○ General invoices are used to record any non-contract invoices that you receive. You can also process invoices for purchase orders.
-  **APPLICATIONS FOR PAYMENT** ————○ Provide the owner with a summary of the completed work for each cost period.

# VISIBILITY

## BUDGET AND COST MANAGEMENT

**The industry standard in Construction Budget and Cost Management, developed by the makers of Prolog.**

*With over 25 years of successful project deliveries ProjectSight provides the forward-looking project financial information you need to make better decisions on your next project.*

### GAIN VISIBILITY

---

Relevant, timely, and accurate information is easily available to react to changes and issues before it is too late.

### ELIMINATE SURPRISES

---

Gain visibility into potential changes before they occur. Provide complete information into the root cause of any issue, and allow you to stay on time and within budget.

### PROTECT PROFITABILITY

---

All cost, schedule, and design impacts are clearly identified and communicated. ProjectSight gives your management team confidence that your bottom line is protected from a billings and claims perspective.

Configurable Budget Codes for easy reporting.

Easily make net zero transfers of money between budget accounts

Choose the financial columns you want to analyse and gain visibility into budget, commitments, actual cost, and forecasting.

The ProjectSight Budget module gives you complete visibility into the financial health of your project, providing you a forward-looking view of potential issues so you can react.

- *Slice and dice information the way you want to and drill into the details. It's all at your fingertips.*

## BUDGETING

# CONTRACTING

Easily create and manage all of your contracts in one place. ProjectSight makes sure that all agreement details are captured so that you can get paid for the work as agreed to.

- *Purpose built for construction, ProjectSight contracts are intuitive and straight forward.*

Item No. *	Description	Sched Value	Budget Code *	Spec Section	Material Code	Locked	Invoiced	Balance	Retain
001	Structural Steel	1,450,000.00	03.051000.SC.DC			<input type="checkbox"/>	0.00	1,450,000.00	
002	Metal Decking	659,250.00	03.051000.SC.DC			<input type="checkbox"/>	0.00	659,250.00	
003	Temporary Generators	35,000.00	03.051000.SC.DC			<input type="checkbox"/>	0.00	35,000.00	
004	Revised moment frame welding detail	11,250.00	03.051000.SC.DC			<input type="checkbox"/>	0.00	11,250.00	
005	Field welding elevator support	17,000.00	03.051000.SC.DC			<input type="checkbox"/>	0.00	17,000.00	

Manage your schedule of values and associate cost with the appropriate budget codes. This provides you visibility into contract status, and makes invoicing consistent.

ProjectSight provides the controls you need to say organized, confident, and in control.

Invoice against the contracted schedule of values and account for the work that has been done in the current billing period. Approved change orders are appended to the schedule of values so that these item don't get overlooked.

The screenshot displays the 'Application For Payment - 005' interface. At the top, there are navigation tabs: APPLICATION FOR PAYMENT, COMMENTS, FINANCIAL SUMMARY, CONTACT INFORMATION, and HISTORY. Below these, a summary bar shows: 74,091,306 (current contract value), 428,062 (previous invoices), 0 (current due), and 73,659,587 (balance to invoice). A 'Notes' section is present but empty. The 'Detailed Items' table is the central focus, listing various construction categories with their respective values. The right sidebar contains fields for Sequence (5), Contract (2045-000 - University), Amount Locked (toggle), App Date (1/10/2019), Period (18-12), Approved On, Category, Paid Date, and Reference. There are also sections for 'ASSIGNED TO' and 'COURTESY COPIES' with 'Add' buttons.

Item No. *	Description *	Scheduled Value	Previous Work Material Install Value	Work This Invoice Value	Material Install This Invoice Value	Total Work Material Install Value	Stored Material Value	Total Complete Value	Net Complete Value	Net Current Due	Percent Complete
001	General Conditions	16,510,000.00	330,200.00	0.00	0.00	330,200.00	0.00	330,200.00	0.00	0.00	
002	Existing Conditions	1,063,500.00	53,175.00	0.00	0.00	53,175.00	0.00	53,175.00	0.00	0.00	
003	Concrete	1,845,000.00	92,250.00	0.00	0.00	92,250.00	0.00	92,250.00	0.00	0.00	
004	Masonry	372,000.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	
005	Metals	2,139,000.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	
006	Woods, Plastics & Composites	600,750.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	
007	Thermal & Moisture Protection	762,000.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	
008	Openings	3,328,250.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	
009	Finishes	3,735,000.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	

ProjectSight allows you manage all of your monthly invoicing and application for payment needs. Make sure that you and your team are getting paid per the contract agreement, including release of retainage.

# INVOICING

# CHANGE MANAGEMENT

ProjectSight gives you a competitive advantage when managing the risks and potential changes on your project, allowing you to capture the risk, link it to the root cause that sparked the change, break it down into manageable pieces, and assign items across multiple contracts.

This allows your team to develop the cost and schedule impacts for all parties impacted, and you get to choose when these risks are reflected on your budget and cost reports.

After development, changes can be routed to the owner for approval, and converted into prime contract and subcontract change orders, formally modifying your contracts.

- ProjectSight simplifies the process of identifying and managing project risk better than anyone else.

Potential Change Order - 001

Add interior doors at stairwells

POTENTIAL CHANGE ORDER COMMENTS HISTORY

# EFFICIENCY

# DOCUMENT CONTROL

**ProjectSight makes project teams significantly more productive by connecting people and technologies with timely information that is so complete it unites the virtual and real worlds.**

*ProjectSight streamlines productivity. No more searching through multiple systems to find the drawings and information you need to give an answer fast. ProjectSight ensures that all stakeholders are working from the most up-to-date information available whether you're in the field or in the office.*

## GET LEAN

---

Team members can collaborate and converse on issues rather filling out information on old paper based forms. ProjectSight automates notifications and eliminates wasting time on unproductive tasks.

## ESTABLISH TRUST

---

ProjectSight establishes trust with the all project stakeholders. Information is thorough, complete and a record of communication is available so you and your team gains credibility and maintains professionalism.

## CREATE ACCOUNTABILITY

---

ProjectSight helps you operate as a team and ensures everyone is held accountable.

An easy to use team file storage area. ProjectSight comes with unlimited storage for your project related files.

**FILE LIBRARY**

Powerful staging area that allows you to easily upload, review and publish drawing to the project team.

**DRAWING SETS**

Your access to all the latest design information. The ProjectSite Drawings module allows you to create records and annotate directly on the .pdf drawing files

**DRAWINGS**

Manage the process of getting your team the answers they need to identify risk and stay on schedule.

**RFIs**

A team work space to gather all information required by the owner for review and approval, before installation.

**SUBMITTALS**

Meeting minutes are used for managing the agendas, invitations and notes for your meetings. Create a series of related meetings and carry forward unresolved items.

**MEETING MINUTES**

The starting point for capturing any identified risks on your project.

**ISSUES**

Action Items allow to formally assign a tasks and track their completion.

**ACTION ITEMS**

# DRAWING SETS

When it comes to project management, control is everything. We've talked to project managers across a broad spectrum of construction projects, and nearly all project managers report a common challenge.

- *Loss of visibility and lack of control over design and documentation versions.*

The ProjectSight Drawing Sets module allows you to simply upload the .pdf versions of the latest Design files, and it will automatically extract the sheet name, number and version the file for you. You can then review the information and publish the sheets out to the team.

Once published the latest version of the file will be available for everyone.

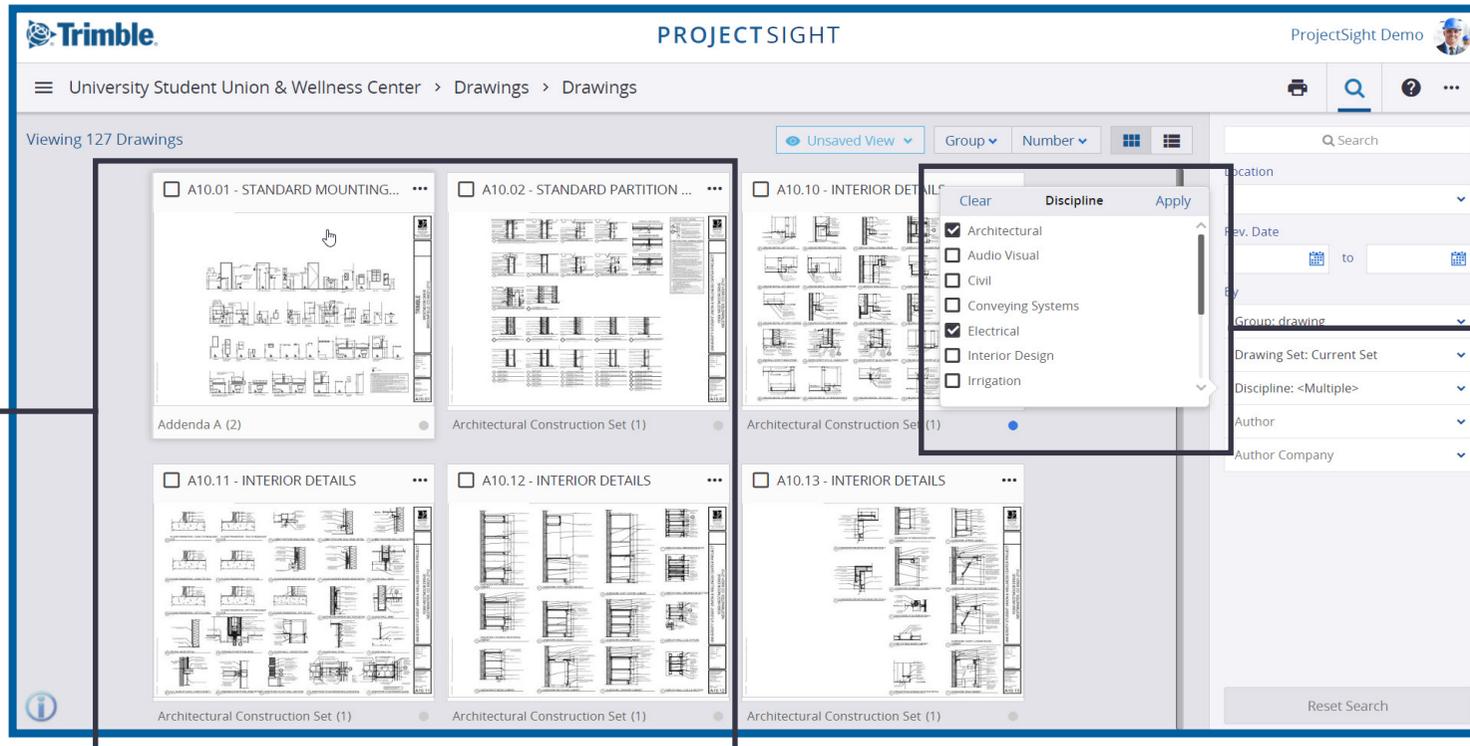

The screenshot displays the ProjectSight interface for a project titled "University Student Union & Wellness Center". The main area shows a list of 7 drawing sets, each with a card containing the following information:

- 001 - Architectural Construction**: Author Jack Clifton, Created On 1/23/2019, Published ... 97/97, Importance Normal, Due Date 1/30/2019, Open Assignments No Open Assignments.
- 002 - Audio Visual Construction Set**: Author Jack Clifton, Created On 1/23/2019, Published ... 21/21, Importance Normal, Due Date 1/30/2019, Open Assignments No Open Assignments.
- 003 - Civil Construction Set**: Author Jack Clifton, Created On 1/24/2019, Published ... 36/36, Importance Normal, Due Date 1/31/2019, Open Assignments No Open Assignments.
- 004 - Electrical Construction Set**: Author Jack Clifton, Created On 1/25/2019, Published ... 29/29, Importance Normal, Due Date 2/1/2019, Open Assignments No Open Assignments.
- 005 - Landscape Construction Set**: Author Jack Clifton, Created On 1/25/2019, Published ... 6/6, Importance Normal, Due Date 2/1/2019, Open Assignments No Open Assignments.
- 006 - Structural Construction Set**: Author Jack Clifton, Created On 1/25/2019, Published ... 18/18, Importance Normal, Due Date 2/1/2019, Open Assignments No Open Assignments.
- 007 - Addenda A**: Author Howard Roark, Created On 1/29/2019, Published ... 12/12, Importance Normal, Due Date 2/5/2019, Open Assignments No Open Assignments.

The interface includes a search bar, filters for "Default View", "Group", and "Number", and a right-hand sidebar with filters for "My Assignments", "Assigned to Me", "Assigned to My Company", "Status" (Draft, Open, Closed), "Created On", and "Due Date".

Thumbnail views of the drawings allow people in the field on mobile devices to easily identify the files they are looking for.

Easily sort and filter out the information you are not interested in.

ProjectSight keeps your entire team up to date with the most current versions of the drawings. This keeps subcontractors and people in the field connected and informed.

- *Eliminate costly rework because people are building off of the wrong information.*

# DRAWINGS

# REQUEST FOR INFORMATION

In addition to the traditional RFI process shown earlier, ProjectSight provides additional options for working with and collaborating on information.

- *Collaboration in context allows you to get the job done faster with out having to switch screens.*

Create RFIs and other ProjectSight records with locational context. This allows the user the ability to simply show where some thing is happening, or allow them to raise issues while working with drawings.

The RFI will show up in the traditional RFI log and cross link the documents automatically for you.

Group and sort items any way you want. Sorting by due date or subcontractor can really help while having team meetings.

PDF Markup tools make the review process simple.

The screenshot displays the Trimble ProjectSight Submittal module. The main interface shows a list of submittals with columns for Number, Revision, Spec Section, and Spec Sub Section. A search filter is applied for 'Due Date: 2/3/2019 (115)'. A pop-up window displays a PDF document for 'LITHONIA LIGHTING' '6CNAT' Continuous Narrow Aperture Troffer, showing technical specifications and a diagram. The interface includes a sidebar with navigation options like 'Warranty Management Plan', 'Warranty Tags', and 'Spare Parts Data'.

Number	Revision	Spec Section	Spec Sub Section
+ Due Date: 2/3/2019 (115)

The ProjectSight Submittal module provides powerful tools to help you identify, communicate, gather, package and get approvals on all the items required for submission by the owner.

- Protecting you from putting material in place with out the proper approvals.

# SUBMITTALS

## MOBILITY

# FIELD MANAGEMENT

**Powerful and easy-to-use tools that keep the people on site safe, informed and in touch with the project team. Allowing people to work in an online or offline mode and keep the focus on the task at hand: delivering the project.**

*Establish direct lines of communication with the field, ensuring everyone is working safely, building off of the most current information available and updating the team on what is actually happening on the site.*

## MANAGING SUBS

---

ProjectSight allows subcontractors to have access to all approved project information and collaborate with you for no additional cost. ProjectSight makes sure information is easily available and thorough, keeping the project moving and coordinated.

## ELIMINATE INEFFICIENCY

---

Simple, configurable and modern processes allow your team to quickly capture, communicate and collaborate around critical information. Providing focused solutions built for contractors.

## MOBILITY

---

ProjectSight was built by people who have personal experience working in the field. For that reason, ProjectSight has included mobile access via an iPad application that works in both an on-line mode and an offline mode when an internet connection is unavailable or too slow.

Safety Notices identify safety violations that were committed by people on the job site. These records can be used over time to monitor the safety records of each contractor.

Daily Reports are used to track the work completed that day, daily activity of the crews, and weather conditions on the job site.

The Checklist module lets you create an unlimited number of process checklists, ensuring that details are not missed.

Punch Items track work that must be done before the Certificate of Final Completion can be issued. A punch item can be assigned to ensure that the items are completed, fixed, or redone according to specifications.

Field Work Directives are used to handle unexpected events, account for additional work and provide clarification about the work.

Notices to Comply direct contractors to comply with instructions. They can be issued for poor workmanship, issue correction or any unfulfilled contractual obligations.

DAILY REPORTS

CHECKLISTS

PUNCH ITEMS

FIELD WORK DIRECTIVES

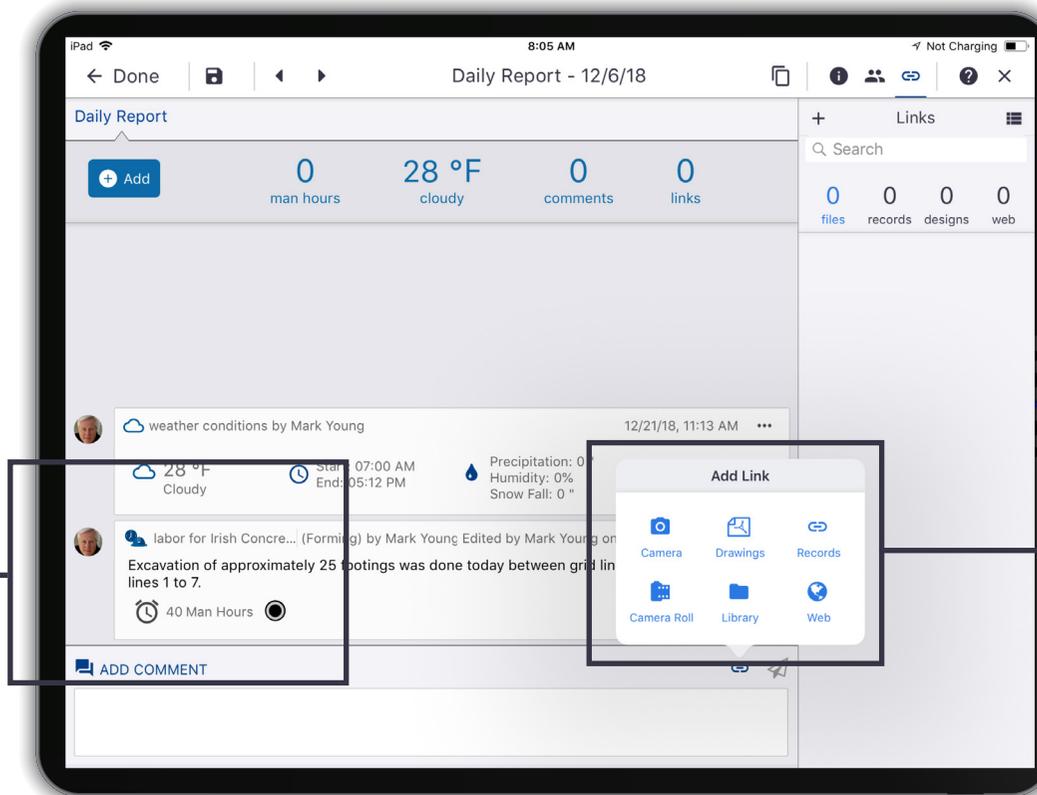

NOTICES TO COMPLY

Multiple Subcontractors can submit the crews' labor for the day to be review by the appropriate manager.

Use the camera to capture pictures and video to provide additional information to the project team who can't be on-site.

ProjectSight's mobile application works in both an on-line and offline mode allowing mobile team members to work with Drawings, Document Control modules, and Field Management modules

- *Daily reports are simple for the project team.*

## MOBILE ACCESS & DAILY REPORTING

# CHECKLISTS

ProjectSight's allows creation of user-defined checklists that can be used by the project team to ensure you are not missing any critical steps during placement, installation, erection or maintenance tasks.

- *Eliminate costly mistakes.*

The screenshot shows a mobile application interface for a checklist titled "CONCRETE POURS". The checklist is displayed on an iPad screen. The top navigation bar includes "Done", "Checklist", and various icons. The checklist items are as follows:

Field	Value	Pass	Attn Req'd	N/A	Right Arrow	
Delivery Note No.		0	Pass	Attn Req'd	N/A	>
Truck No.			Pass	Attn Req'd	N/A	>
Batch Time			Pass	Attn Req'd	N/A	>
Start Pour Date/Time			Pass	Attn Req'd	N/A	>
Finish Pour Date/Time			Pass	Attn Req'd	N/A	>
Volume		0	Pass	Attn Req'd	N/A	>
Temp (Celcius)		0	Pass	Attn Req'd	N/A	>
Measured Slump		0	Pass	Attn Req'd	N/A	>
No. Cylinders Made		0	Pass	Attn Req'd	N/A	>
Cylinder Ref. No.		0	Pass	Attn Req'd	N/A	>

A callout box highlights the status buttons for the "Batch Time" row, showing the options "Pass", "Attn Req'd", and "N/A" with a right arrow.

Create custom data types to capture the data you want and include pass fail criteria with follow up actions.

# REASONS WHY

## WE ARE DIFFERENT

- ✓ PROJECTSIGHT IS A CORE COMPONENT OF THE TRIMBLE CONSTRUCTIBLE PROCESS
- ✓ PROJECTSIGHT IS CONNECTED WITH e-BUILDER ENTERPRISE AN OWNER SOLUTION
- ✓ PROJECTSIGHT IS CONNECTED AND BUNDLED WITH TRIMBLE CONNECT FOR ACCESSING CONSTRUCTIBLE MODELS
- ✓ PROJECTSIGHT IS THE NEXT ITERATION OF THE INDUSTRY LEADING BUDGET AND COST MANAGEMENT SOLUTION
